Paneltech Overlays Our Values

Superior Performance

The key to the consistent high performance of Paneltech Overlays relative to other manufacturers is the focus on thorough and complete saturation of the overlay through its profile. This complete saturation cannot be achieved following the high-speed, low-cost approach adopted by the competition. This strategy of complete saturation is crucial to the durability and performance of the overlay in concrete-form as well as general purpose applications.

Outstanding Value

While Paneltech Overlays may not always carry the lowest pricing, the value to your customers is much higher per dollar spent. Further, we are always willing to examine competitive offers and we stand willing to compete for your business. Should you doubt the value of Paneltech's offerings, just try to imagine what your prices might be without Paneltech in the market.

Competent and Responsive Service

Our service staff has extensive experience in solving issues regarding performance of the panel/overlay system. This experience includes a broad base of resin chemistry and web manufacturing as well as panel manufacturing.

About Paneltech

Paneltech Products, Inc. is a young, growing, forward-thinking company comprised of people who have common values and share a common goal...providing environmentally responsible leadership in manufacturing the highest quality green products for home, business, industry, military and education.

Our purpose...to make valuable composites the right way...says a great deal about who we are. Our suite of products protects lives, enhances lifestyles, and reduces our dependency on oil extraction and tree cutting—all while treading lightly on the earth. Nature's way.

Our panel overlays are designed to increase the value of the wood products that they cover by increasing their durability, enhancing their appearance and creating uniform surfaces for decorative applications.

Paneltech overlays are designed for high performance end uses and superior processability. Our product line also includes FSC certified overlays.

Paneltech is located at the Port of Grays Harbor in Hoquiam, Washington at the edge of the Olympic Rainforest.
